

Dhiego Cristofolini

SENIOR PRODUCT DESIGNER

Curitiba, Brazil | dhiegopiresc@gmail.com | linkedin.com/in/diego-cristofolini | cristofolini.site

SUMMARY

7 years designing SaaS and fintech products across onboarding, KYC, pricing, checkout, and design systems delivered for engineering handoff. Delivered a 6% conversion increase through a pricing and checkout redesign. Works best async, embedded in cross-functional teams, delivering dev-ready Figma files with variables, tokens, and documented specs. Open to full-time remote roles on international product teams.

EXPERIENCE

Senior Product Designer & Founder

Feb 2018 – Present

Vellumwire — Remote

- Founded Vellumwire, a web design studio focused on service businesses that need more inbound leads. Lead product design across SaaS and fintech clients covering onboarding, pricing, checkout, and design systems.
- Redesign pricing and checkout flows for a fintech client and increased conversion rate by 6%.
- Built a four-layer token architecture (Core, Palette, Brand, Semantic) that reduces client re-theming to a single-layer change with no component rewrites required.
- Rebuilt Fiter's site from 22 to 100 SEO score across all audit categories in two weeks, resolving 9 critical issues before opening Figma.

Senior Product Designer

Jan 2025 – Aug 2025

MedMe Saúde — Full-time, Remote

- Designed an on-demand home healthcare platform from scratch, covering scheduling logic, identity verification, escrow payment, and three-sided accountability across patient, professional, and clinic.
- Projected +35% checkout conversion through progressive disclosure and form reduction from 20+ to 12–14 fields, grounded in Baymard benchmarks.
- Built a responsive design system for clinical dashboards and medical workflows across web and mobile.

Product Designer

Jun 2023 – Jan 2024

Instivo — Full-time, Remote

- Designed a governed data workspace for a multi-unit retail SaaS, replacing six disconnected tools with a card-linked entity architecture and a four-part rule engine that lets operators configure thresholds, access, and restocking without IT involvement.
- Rebuilt the design system into a four-layer token architecture — when mobile scope expanded mid-project, the responsive layer was already in place with no parallel system required.

Product Designer

Jul 2022 – Jun 2023

Nineblocks — Full-time, Remote

- Designed conversion-focused landing pages and product screens for fan token and NFT platforms across web and mobile.
- Created 2D illustration and iconography for product identity and marketing.

UI/UX Designer

Mar 2022 – Jun 2022

Vega I.T. — Full-time, Remote

- Designed booking portals and internal management tools for hospitality tech. Delivered UI layouts, interaction states, and responsive web apps.

UX/UI Designer

Oct 2019 – Feb 2022

Ensiht — Full-time, On-site

- Designed SaaS platforms for B2B clients in agile sprints, from discovery and wireframing to high-fidelity handoff.
- Delivered UI components and specs across multiple digital products in the Meaple ecosystem.

SKILLS

DESIGN	Product Design, UX/UI Design, Interaction Design, Information Architecture, User Research, Wireframing, Prototyping, Design Systems, Design Tokens
TOOLS	Figma, Framer, Webflow, HTML, CSS
DOMAINS	SaaS, Fintech, Healthtech, B2B, Onboarding, KYC, Pricing, Checkout, Conversion Optimization
