ABOUT

I’m a Senior Product Designer and Consultant with 8 years of experience engineering SaaS, B2B, and fintech products from discovery to production-ready UI. Deeply focused on advanced design tokens, conversion-driven UX, and bridging the design-engineering gap with accessible, standards-compliant interfaces.

Experienced leading remote product sprints and collaborating with international stakeholders across time zones to deliver business metrics, system scalability, and optimized user retention.

WORK EXPERIENCE

- AUG 2025 - PRESENT | Senior Product Designer & Founder, Vellumwire

• Lead product design studio focused on SaaS. Design onboarding, pricing, ecommerce, checkout, and design systems for international clients.

• Redesigned landing page and form flow for Selo H, successfully increasing conversion rate by 50%.

• Built a four-layer token architecture (Core, Palette, Brand, Semantic) that reduces client re-theming to a single-layer change with no component rewrites required.

• Applied WCAG 2.1 AA standards across all design system components, documented in component specs and validated through accessibility audits.

• Rebuilt Fiter's site from SEO score 22 to 100 across all audit categories in two weeks, resolving 9 critical issues before opening Figma.

○

JAN 2025 - AUG 2025 | Senior Product Designer, MedMe Saude (Contractor)

• Built product design for an on-demand home healthcare platform from scratch: scheduling logic, identity verification, escrow payment, and a three-sided accountability system.

• Conducted user research and usability testing with patients and healthcare professionals to validate scheduling logic and trust architecture decisions.

• Projected +35% checkout conversion through progressive disclosure and form reduction from 20+ to 12-14 fields, grounded in Baymard benchmarks.

• Built a responsive design system for clinical dashboards and medical workflows.

○

JAN 2024 - DEC 2024 | Product Designer, Freelance

• Delivered independent web design and branding projects for small businesses and startups, focusing on conversion-centered landing pages and visual identity systems.

• Improved responsive web experiences and UI layouts for early-stage digital products.

○

JUN 2023 - DEC 2023 | Product Designer, Instivo (Contractor)

• Designed a governed data workspace for a multi-unit retail SaaS, replacing six disconnected tools with a card-linked entity architecture and a four-part rule engine.

• Designed complex multi-step workflows and interaction patterns for high-density data interfaces.

• Led discovery workshops and user interviews with retail managers to map operational pain points.

• Rebuilt the design system into a four-layer token architecture, ensuring mid-project mobile responsiveness with no parallel system required.

○

JUN 2022 - JUN 2023 | Product Designer, Nineblocks (Contractor)

• Designed conversion-focused landing pages and product screens for web and mobile fan token and NFT platforms.

• Created 2D illustration and iconography for product identity and marketing.

○

JAN 2022 - JUN 2022 | UI/UX Designer, Vega I.T (Contractor)

• Designed booking portals and internal management tools for hospitality tech. Delivered UI layouts, interaction states, and responsive web apps.

○

JUN 2019 - DEC 2021 | Product Designer, Ensignt (Contractor)

• Led end-to-end product design from research to MVP for Meaple and Facto, including A/B testing, user research, and cross-functional collaboration with engineering and product.

• Designed SaaS platforms and digital products for B2B clients in agile sprints, from discovery and wireframing to high-fidelity handoffs.

• Delivered UI components and specs for the Meaple ecosystem, including QuaQ and Facto.

○

JAN 2019 - JUN 2019 | Instructor, CEBRAC Curitiba

• Taught Adobe and Office package classes, html5, css3 and jquery.

○

JAN 2017 - JUN 2017 | Graphic Designer, Gás

• Production of Illustrations and site development for marketing.

○

JAN 2016 - JUN 2016 | Designer & 2D Artist, NUTE

• Production of Illustrations and infographics to compose the content of the modules on the website, focused on distance learning.

SKILLS & APTITUDES

PRODUCT & UX

• Product discovery and UX research

• User flows, information architecture and interaction design

• Rapid Prototyping & Usability Testing

UI & VISUAL DESIGN

• Web and mobile UI for SaaS and B2B products

• Scalable Design Systems & Component Libraries

• Design Tokens & Advanced Token Architecture

• Conversion-Driven UX & Optimization

COLLABORATION & DELIVERY

• Design-to-Development Handoff & Spec Documentation

• Working within agile / Scrum teams

• Cross-Functional Stakeholder Management

• Design QA & Implementation Audits

• Product Strategy & Roadmap Alignment

LANGUAGE

Portuguese	Native	English	Advanced

SOFTWARE & WORKFLOW

• Figma, FigJam, Framer, ProtoPie, Penpot

• Adobe Creative Cloud

• HTML, CSS, JavaScript

• AI-Powered Workflows with Claude, Claude Code, Cursor, Replit, Lovable, Antigravity, Gemini, ChatGPT, LLM workflows, agentic prototyping

• Hotjar, Google Analytics, Maze

• Jira, Trello, Notion, Miro
